run 30 mins

During the Detox Foot Bath, you will actually see the cleansing process take place as the water interacts with a compound electric current and magnetic field structure. This body cleansing process results in the correct frequency required for cells to return to a healthy state, and to release waste that has been bonded to them over the years. This detoxification therapeutic procedure also enhances the effects of other therapies.

Ear Candling

Ear candling is a safe and natural therapy which has been used for centuries for its specific healing functions. Ear candling is used primarily for cleaning the ears and to promote a healthy atmosphere in the ears, sinus cavities and throat. Ear candling is excellent in the treatment of nose and throat congestion, sinusitis, headaches, tinnitus, otitis external/tropical ear. It is also an ideal relaxation treatment for stress or anxiety related symptoms.

Cupping

A technique that is especially useful in the treatment of problems of local Chi or blood stagnation in the channels, and is usually performed as an alternative to acupuncture.
